2022 Bid Round

## DRC Bid Round 2022 – Lake Tanganyika

### LOCATION

The Tanganyika Graben is part of the West Branch of the East African Rift. The Congolese part of the Tanganyika Graben is approximately 16,500 km<sup>2</sup> (~15,500 km<sup>2</sup> offshore and ~1,000 km<sup>2</sup> onshore).

Lake Tanganyika is 650 km long, 50 to 80 km wide and having a depth of about 1470 m.

### BID ROUND BLOCKS

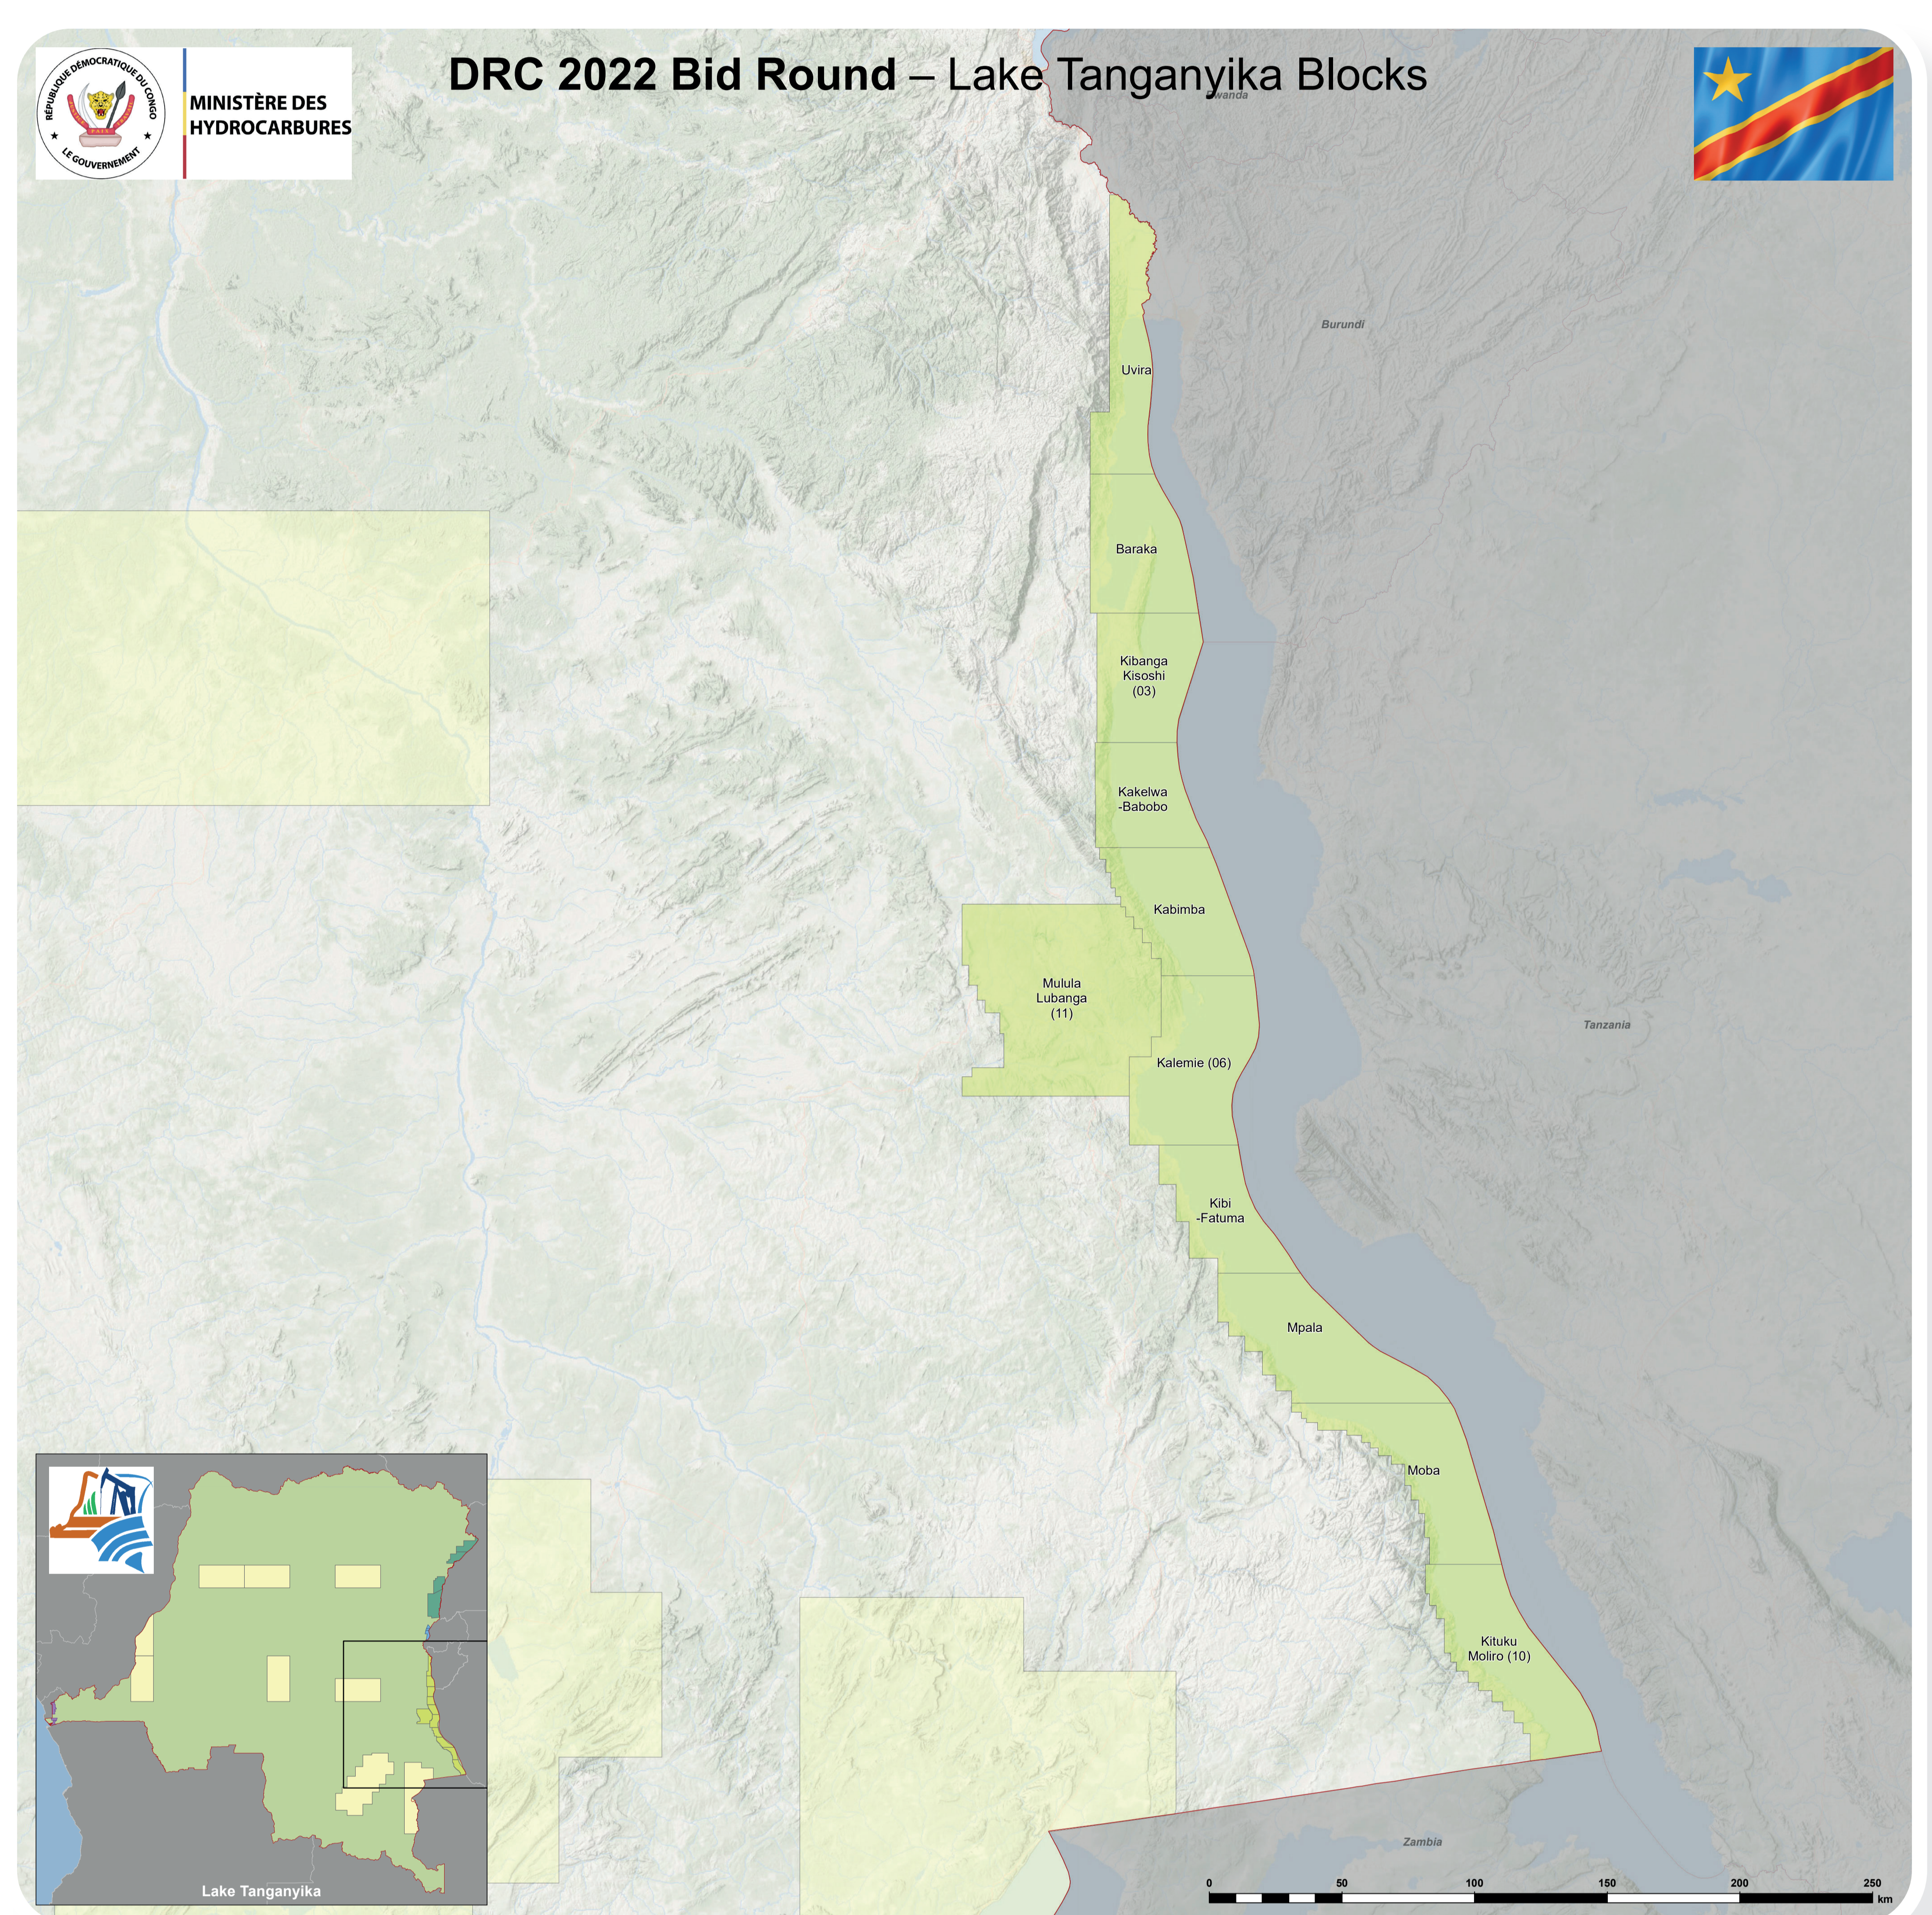

11 blocks are offered: Baraka, Kabimba, Kakelwa-Babobo, Kalemie (06), Kibanga Kisoshi (03), Kibi-Fatuma, Kituku Moliro (10), Moba, Mpala, Mulula Lubanga (11) & Uvira.

### SOURCE ROCKS

Miocene lacustrine argillites, Permo-Triassic Lukuga Formation, Permian charcoals and lacustrine argillites.

### RESERVOIRS

Tertiary turbidites and Permo-Triassic fluvio-continental sands.

### PROSPECTIVITY

4 wells are drilled in the Tanganyika Graben and several oil seeps are documented including the spectacular underwater seeps of Cape Kalamba. Important discoveries in the Ugandan part of the Albertine Graben where the Late to Middle Miocene Kisegei Sandstones are considered as the main theme of Exploration.
